The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 24 and 30-42 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The previous rejection still applies.

Applicant's arguments filed 12/2/05 have been fully considered but they are not persuasive. Applicant argues the new language of the claims is not new matter. This argument is not persuasive because the structure defined by the new claims is not originally disclosed. There is no indication that the inventor had possession of the newly claimed structure. It may be an obvious variant of the originally disclosed structures but this is not a persuasive reason for entering new matter. Specifically, there is no indication that the original disclosure anticipates the newly claimed structure including all the limitations of claim 24 in a single device. There is no original disclosure including the structure of the last eight lines of claim 24. Regardless of whether there needn't be exact antecedent basis for the language of claims, there is no antecedent basis in the original disclosure for the structure defined by the last eight lines of claim 24. No figures show the structure of new claim 24 and no original disclosure language anticipates the claim language. The new claim language may be obvious to one of ordinary skill as it basically combines two structure embodiments into one device but that again is not

proper rationale for entering new matter. Whether the new matter is obvious or not is relevant here for determination of what constitutes "new matter". There is no indication or language in the original disclosure that applicant intended to claim the new matter of claim 24 or clearly had possession of the "new matter".

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
